Qualities of Instructor which contributed to success of the course.	Qualities of Instructor which hindered success of the course.	Opinions of course, including printed materials.	Additional comments to improve overall quality of the course.	Any other comments.
Very caring and helpful.	None	The field trips really made the class. Meeting all the professionals and professors put career paths into big picture.	The session about grad school was very helpful.	
Jane was awesome!!! Super funny, easy to talk to about life or coursework, and made the class really easy going but still learned a bunch! Really good places we went to for field trips and she was always good about asking questions (relevant to students and the talks) to presenters when students never had any or were maybe too shy to ask.	Nope she rocks	Great! I loved this course- it was typically the highlight of my week	Everything was very hands on (that's how I learn best!) but if there were even more hands on things that'd be cool (dunno how she would fit anything else in though we stayed busy!)	Class was fun definitely showed me some avenues I may consider for career or just interests in general! Grad school presentation was awesome and really helpful btw. Also Lily was great just don't know how to evaluate her!!
The instructor was enthusiastic and quick to respond to e-mails.	None	Great class! I really enjoyed it!	I don't really have any.	Thank you for a fun and interesting semester! It was a blast!
She passionate and knowledgeable about the subjects she taught us and I felt like she wanted me to succeed.	No.	I loved this course! They chose a variety of really cool things for us to see. In such a broad major, where I love everything, it was really important for me to see every aspect of the environmental science field, and they were able to show it to me in a helpful way.	I don't think anything needs to be changed!	
She is very passionate about what she does which translated to an exciting class. She also was great at communicating with students and offering her time outside of class to give aid to students when they needed help figuring out their lives.		This has been one of the most relevant courses I have taken at UF.
