Qualities of Instructor which contributed to success of the course.	Qualities of Instructor which hindered success of the course.	Opinions of course, including printed materials.	Additional comments to improve overall quality of the course.	Any other comments.
				This class was one of my favorites! The in-class activities were always entertaining, educational, and relevant to the course material. Assignments and exams were also graded fairly. Thank you for a great semester and for being so cool!

Qualities of Instructor which contributed to success of the course.	Qualities of Instructor which hindered success of the course.	Opinions of course, including printed materials.	Additional comments to improve overall quality of the course.	Any other comments.
Dr. Anderson is extremely passionate about the field, which really conveys unto her teachings and thus our enthusiasm to learn.	None	Very valuable - teaches how to interact with people, which is a huge component of our careers	Only recommendation would be to delineate instructions a little more clearly - other than that, I learned a lot and highly enjoyed this course!	
Dr. Anderson is so enthusiastic about the material and is truly an expert. Aside from being passionate and an expert in her field, Dr. Anderson is a great professor. She understands the struggle of students and makes the material very relevant. She is funny, understanding, flexible, and a very refreshing person in the WEC department. I hope more of the future professors at WEC share these qualities as well because it truly aids in learning. The field trips were educational and fun. She is a great professor and an awesome professional.	No, she was great.	This course is interesting and definitely necessary for wildlife professionals going into the field. Aside from creating surveys and being great field experts, I believe wildlife professionals need to understand the public and stakeholders.	I learned a whole bunch in this course and it was all thanks to Dr. Anderson. She kept the class engage with the projects and assignments and brought in great guest speakers.	Dr. Anderson is a great addition to the WEC department and it will be sad to see her go as she is was a great professor.
I liked how she was funny and very honest about how human dimensions are in real life. She created a very comfortable environment that made the class enjoyable. I liked how we did a lot of application exercises.				
Jane is very personable and an excellent professor. She is funny and knowledgeable and keeps students attention. It's obvious she cares for and respects her students. I like that she told us about her own personal experiences in human dimensions, both the good and the bad. Ben was also very friendly and helpful. He was always available for myself or others when we had issues.	No.	Overall this course was very interesting. For the most part, all of the assignments were interesting & enjoyable and not boring or tedious. Some of the in-class activities i could've done without because some I didn't feel were relevant or added to my knowledge. The exam reviews were very beneficial for me. The guest lecturers were also great. The end of class potluck was also awesome!		Thanks Jane! Thanks Ben! You two are awesome! I learned a lot and had a lot of fun!
Dr. Anderson made us all very comfortable with each other early in the semester, which definitely helped during discussions. Her teaching style is casual but clear and she has a way of presenting that is engaging and personal.	None. She did an excellent job.			At first, I was disappointed that Susan Jacobson wasn't teaching the class because I heard that she's great, but I am very pleased that I got the opportunity to learn from Dr. Anderson. She is very bright and well spoken, and easy to talk to. She even took time to give us a presentation on grad school outside of class because sometimes, it can be hard to find the right resources. Students in the future will be very lucky to take her class.
