3. Comments

3.1) Any comments:

- Dr. Anderson has been professional, respectful of students and their time, and very clear and helpful in her communications. She has also been very thorough both in her ability to teach the curriculum as well as communicating the structure and timing of assignments. Overall this class has been very informative and a pleasure to take. It has been a very positive experience.
- This class is set up in a way that helps me understand what we are going over for the week, with clear instructions and a large amount of time to complete the models. For distance learning, the discussion boards are amazing and allow us to interact with other students even when we aren't near each other. The professor is very open and amazing, even from far away I can tell that if this class was in person, it would be a very safe/open learning environment.
- really enjoyed this class, great teacher
